Elisha Lambert Oigara

Full-Stack Software Engineer | AI-Enhanced Developer

+254 742 978 567 | elishaoigara50@gmail.com | Portfolio | GitHub: elishaoigara | Nairobi, Kenya

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building production-grade web applications using React.js, Node.js, TypeScript, and REST/GraphQL APIs. Proficient in leveraging AI tools — including GitHub Copilot, Claude, and ChatGPT — to accelerate development cycles, improve code quality, and derive data-driven insights. Pursuing parallel qualifications in Business Information Technology (MKU) and Computer Science (UoPeople), combining deep technical skills with product and business strategy thinking. Proven ability to deliver scalable, maintainable systems from architecture through deployment.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3
Frontend	React.js, Redux, Next.js, Tailwind CSS, Bootstrap, SASS, Webpack, Responsive Design
Backend & APIs	Node.js, Express.js, REST APIs, GraphQL, JWT Authentication
Databases	MySQL, Firebase, Redis, Database Schema Design
AI & Dev Tools	GitHub Copilot, Claude AI, ChatGPT — used for code generation, review, debugging, and workflow automation
DevOps & Tools	Git, GitHub, Vercel, npm, VS Code, Linux CLI
Soft Skills	System Design, Technical Problem-Solving, Cross-Functional Collaboration, Agile/Iterative Development

PROJECTS

POS Manager — Full-Stack Retail Management Platform
React · Node.js · MySQL · Redis

Live Demo ↗

- Architected and deployed a full-stack POS system with barcode-driven product management, multi-location kiosk monitoring, and row-level access control — demonstrating end-to-end ownership of a production web application.
- Built live sales analytics dashboards using React and Chart.js, enabling real-time inventory and staffing decisions for retail operators.
- Designed a normalised MySQL schema and RESTful API layer capable of handling concurrent sessions across distributed kiosk locations.
- Integrated Redis caching to reduce database load on frequently accessed product and pricing data.

MarketMint — Real-Time Cryptocurrency Tracker
React · REST API · Tailwind CSS

Live Demo ↗

- Engineered a responsive crypto tracking platform consuming live market APIs, with persistent watchlist management and smooth state handling across price fluctuations.
- Implemented efficient polling and error-boundary patterns to ensure reliability in a latency-sensitive, data-intensive environment.

FinLog — Personal Finance & Budget Tracker
React · Chart.js · Firebase

Live Demo ↗

- Built a personal finance app with income/expense logging, budget-vs-actual comparisons, and dynamic Chart.js visualisations backed by Firebase real-time database.
- Designed a clean, accessible UI with mobile-first responsive layout using React and Bootstrap.

SkyCast — Weather Application
React · OpenWeatherMap API · Bootstrap

Live Demo ↗

- Developed a responsive weather app with real-time API calls, metric/imperial unit toggling, geolocation support, and comprehensive error handling for edge cases.

EDUCATION

ALX Software Engineering Programme — Front-End Specialisation Completed: July 2025

ALX Africa

- Rigorous 12-month programme covering C, Python, JavaScript, data structures, algorithms, system design, and full-stack web development.
- Certificate of Completion issued July 24, 2025 — credential verified at: savanna.alxafrica.com/certificates/PscX8Cf7FN

Bachelor of Science — Business Information Technology In Progress

Mount Kenya University (MKU)

- Focus: information systems strategy, business process analysis, and scalable technology application.

Associate of Science — Computer Science In Progress

University of the People (UoPeople)

- Focus: algorithms, data structures, computational theory, and systematic problem-solving.

CERTIFICATIONS

Certificate of Completion — ALX Software Engineering Programme ALX Africa · July 24, 2025
